# Öchsle Railroad

## 20483 ÖMB Steam Locomotive, Road Number 99 716

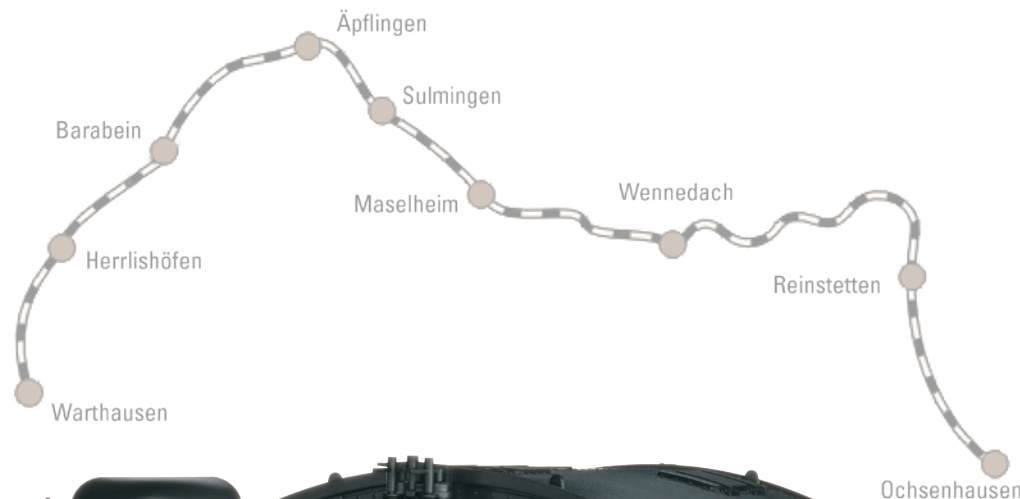

Öchsle Railroad narrow gauge steam locomotive. Road number 99 716 is a narrow-gauge steam locomotive with ten driving wheels still currently in use. It runs on the Öchsle Museum Railroad between Warthausen and Ochsenhausen. Since the Fifties the ladder has been permanently mounted on the left side of road number 99 716.

This is a model of an Öchsle Railroad narrow gauge steam locomotive. The paint scheme and lettering are prototypical for Era VI. Two powerful motors drive the locomotive. The locomotive has an mfx/DCC decoder with many light and sound functions such as headlights that change over with the direction of travel, firebox lighting, cab lighting, running sounds, whistle, and much more. The locomotive has a built-in smoke generator with smoke exhaust synchronized with the wheels. The locomotive has many separately applied details and cab doors and a smoke box door that can be opened. For transport reasons the ladder is included for installation. Length over the buffers 41 cm / 16-1/8".

*On the occasion of the 125th anniversary*

Ladder included as a part to be installed

- Driven by two powerful motors
- Articulated running gear, guaranteeing operation on R1 curves with a radius of 600 mm / 23-5/8"
- Steam exhaust synchronized with the wheels
- Cylinder steam
- Digitally controlled running gear lights
- Digitally controlled cab lighting
- Digitally controlled flickering of the boiler fire in the firebox
- Smoke box can be opened with indicated interior details of the smoke box

An affectionate look back at 125 years of the Öchsle Railroad can be found here: <https://www.lgb.com/products/20483>

### 33079 ÖMB Passenger Car

This is a two-axle passenger car from the Öchsle Museum Railroad, as it still looks in use in Upper Swabia. The paint scheme and lettering are prototypical for Era VI. The doors can be opened. Length over the buffers 30 cm / 11-13/16".

- Metal wheelsets
- Interior details
- Doors that can be opened

A prototypical train for the Öchsle Museum Railroad can be made by combining this car with the 20483 locomotiv, and the 41024 museum car.

## **21482 SOEG Class VII K Steam Locomotive, Road Number 99 731**

Road Number 99 731 has been in use in the DRG version for a long time on the Zittau Narrow Gauge Railroad. In contrast to the other locomotives, this unit was returned to its Era II look by the employees of the SOEG, and it runs mainly pulling the German State Railroad train. A highlight on the Zittau Narrow Gauge Railroad is the annual major event "Historik Mobil" / "Travelling History", on the occasion of which road number 99 731 was also in use in the light gray photo paint scheme. It was thus the centerpiece of the event, and it was remembered for a long time by many railroad fans.

This is a model of the narrow gauge steam locomotive, road number 99 731, of the Zittau Narrow Gauge Railroad. The paint and lettering in the photo paint scheme are prototypical for the locomotive as it was at "Historik Mobil" / "Travelling History". Two powerful motors drive the locomotive. Traction tires. The locomotive has an mfx/DCC decoder with many light and sound functions such as headlights that change over with the direction of travel, firebox lighting, cab lighting, running sounds, whistle, and much more. The locomotive has a built-in smoke generator with smoke exhaust synchronized with the wheels and it has cylinder steam. There are many separately applied details, and the cab doors and smoke box door can be opened. Length over the buffers 51 cm / 20-1/16".

- Driven by two powerful motors
- Articulated running gear, for reliable operation on Radius R1
- Pulsed steam exhaust synchronized with the wheels
- Cylinder steam
- Digitally controlled running gear lights
- Digitally controlled cab lighting
- Digitally controlled flickering of the boiler fire in the firebox
- Smoke box can be opened with interior details of the smoke box indicated

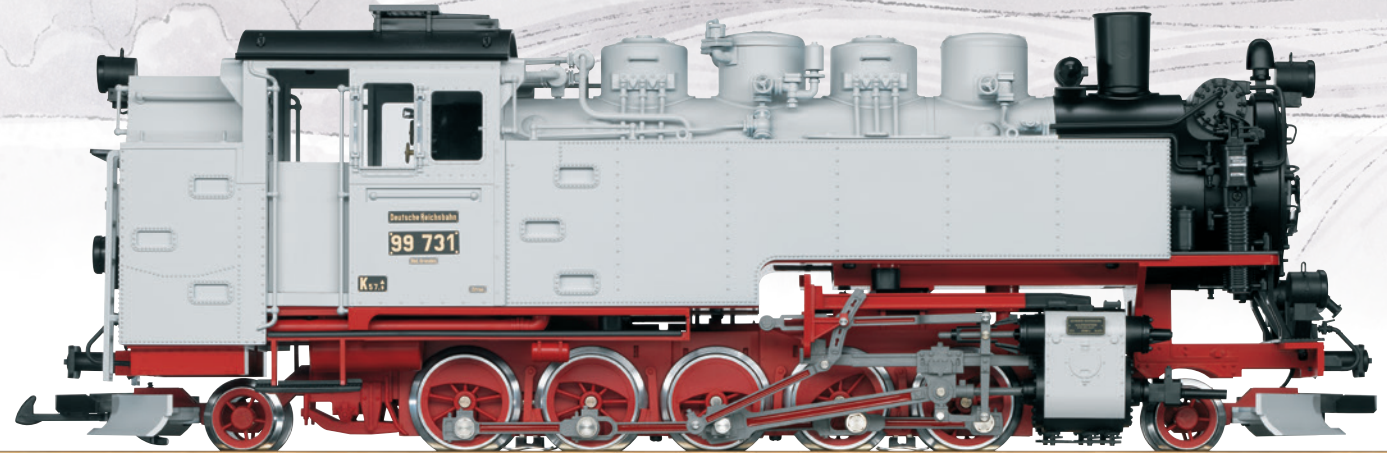

**This model is being delivered in a one-time special series.**

**Road number 99 731 in the light gray photo paint scheme as presented at the "Mobile Historic" display on August 2, 2024**

**The running sounds will also work in analog operation**

# Rhaetian Railroad (RhB)

## **28448 Class Ge 4/4 II Electric Locomotive, Era VI**

The class Ge 4/4 II locomotives with their 2,300 horsepower and a maximum speed of 90 km/h / 56 mph can be seen pulling all kinds of trains on the Rhaetian Railroad network. As early as 1973 the first locomotive of this class – at that time still in a dark green paint scheme and with round headlights – was delivered to the RhB. Updated and converted several times – among other things the locomotives were equipped with rectangular headlights – almost all these units are still in use. These locomotives can be seen from commuter trains up to the Glacier Express. This locomotive, the so-called Pullman Locomotive, runs in a special paint scheme. In the future road number 626 can be seen and admired on the Rhaetian Railroad.

This electric locomotive is the class Ge 4/4 II, road number 626, of the Rhaetian Railroad in a special paint scheme. All 4 wheelsets are driven by two powerful motors. The locomotive is equipped with an mfx/DCC decoder with many light and sound functions. The pantographs are powered by servo motors and can be controlled digitally.

Length over the buffers 57 cm / 22-7/16".

*Official rollout of the prototype  
in September of 2024*

## Reissues

### 36659 Pullman Express Car Set

The RhB (Rhaetian Railroad) owns four such historic salon cars. These elegant, luxuriously equipped cars are run as the "Alpine Classic Pullman Express". This LGB set correctly reproduces the two salon cars As 1143 and As 1144. These cars are prototypically lettered and painted, have complete interior details and interior lighting, and the doors can be opened. Length over the buffers per car 66 cm / 26".

- Prototypically painted and lettered
- Interior details
- Interior lighting
- Doors that can be opened

### 40844 Pullman Express Baggage Car

This RhB baggage car goes with the Alpine Classic Pullman Express salon cars. This car is prototypically painted and lettered, and the doors can be opened. The car has metal wheel sets. Length over the buffers 43.5 cm / 17-1/8".

This baggage car can be added to the 36659 Alpine Classic Pullman Express car set.

VI

**46896 RhB Volg Container Transport Car**

This is an RhB container transport car, loaded with a removable refrigerated container lettered for Volg Consumer Goods, Inc. The paint scheme and lettering are prototypical for Era VI. The car has a new car number. It also has metal solid wheelsets. Length over the buffers 41 cm / 16-1/8".
